How do I use it?

Rework the compost between your hands, so it regains its intended texture. Then you're all set.

Sowing Seeds

- Fill a seed tray with compost and firm gently.
- Sow seeds to the depth and spacing mentioned on the packet. Many seeds have specific germination needs which should be carefully followed.
- Water compost after sowing seeds. Covering the tray with glass or polythene will help prevent drying out.
- Keep trays in a warm area away from direct sunlight until germination occurs.
- Once seeds have germinated, remove glass / polythene and keep compost moist until seedlings are ready for pricking out.

Seedlings/Pricking out

- Prick out seedlings once large enough to handle.
- Hold seedling by the leaves to avoid damage and gently tease the roots from the compost, using a dibber or pencil.
- Space seedlings to allow for vigorous growth.
- Water regularly until the seeds are ready to be potted on.

Potting

- Before potting water plants well and allow to drain.
- Choose new containers that are clean, have good drainage and enough space to allow strong root growth.
- Put plant in new container and fill space in pot with new compost, firming gently.
- Water well after repotting.

Taking Cuttings

- Fill a pot or tray with compost and firm gently
- Prepare the cutting according to the specific needs of the plant. Generally, removing all bottom leaves and making a sloping cut in the stem close to a joint will create a good cutting.
- Make a hole in the compost with a dibber or pencil then place the cutting into the hole and gently firm around.
- Placing in a warm spot away from direct sunlight until cuttings have rooted will give best results.

Container and Hanging Baskets

- Line the basket and fill with compost.
- Plant with trailing plants around the outside and upright plants in the middle.
- Water well.

Jack's Tips

- Reseal the bag after you've used it.
- Store in a dry frost free place away from weedkillers and other garden chemicals.
- Not suitable for ericaceous (lime hating) plants.
- Wear gloves when handling. Wash hands after use.
